service & rental**

PROTECTS YOU AT WORK

STENNEVAD

Trusted PPE partner

Stennevad is your go-to professional partner for Personal Protective Equipment. With more than 66 years of experience, we combine technical expertise with hands-on industry insight. From our base in Esbjerg, Denmark, we support customers nationally and internationally with precise advice and reliable delivery.

We do more than supply gear. We advise, equip, certify and service – ensuring that the right solution is selected, implemented correctly and maintained throughout its lifecycle.

Our team provides sales, inspection and certified service within fall protection and related safety systems. We are an authorised service partner for leading brands such as MSA, Fall Safe, 3M, Honeywell and IKAR, delivering certified service on fall arrest blocks and self-retracting lifelines.

We help you choose the right solution

We focus on identifying the solution that fits your work environment – technically, operationally and commercially. The goal is simple: ensuring you and your colleagues have the right setup to work safely and efficiently. Contact us if you want to know more about us:

PPE Rental Service

Stennevad offers a structured rental setup that simplifies the administration and control of PPE across projects. We handle resource-demanding tasks:

- Registration
- Inspection and service
- Logistics
- Maintenance
- Certificate management

Rental lowers upfront investment, prevents unused stock and guarantees access to approved equipment when your own gear is in service. With strong experience in regional and national standards, we ensure correct service intervals and complete documentation.

As a customer, you gain access to our database with digital overview and full visibility of:

- All equipment
- Registered users
- Locations
- Service status and deadlines

Rental is available short or long-term, depending on your operational needs. We also support rope access projects with tailored solutions. Contact us to discuss how rental can optimise your setup.

Set 1 - Offshore bag

Set adapted to the wind industry, techniques, service teams, etc. Includes the most requested and accepted parts (however, there may be regional requirements in different countries). Note that sliders must be ordered separately, and information about the service interval should be provided.

- Harness (size S/M-2XL)
- MGO Y-line
- Adjustable support line
- Frog offshore connector
- Triple lock carabiners (2 pcs)

Set 2 - Survival bag

Set adapted to the requirements in the wind industry for transfer to offshore wind turbines (however, there may be regional requirements in different countries).

- Survival suit (size M-2XL)
- Man Overboard device - MOB2
- Lifejacket (SOLAS approved)

Set 3 - Evacuation unit

Can be used for rescue/self-evacuation at heights of up to 150 meters - approved for up to 3 people or 285 kg. Note that other lengths can be provided.

- Evacuation unit
- 150 m rope
- 100 cm webbing sling
- Edge protector
- Rope lifting/backpack

Loose parts

Rented individually.
