

**Product:** Rescue stretcher with carrying function

**Type:** RsqTec TURTLE MD

## Product description

The rescue stretcher "TURTLE" is a combination of patient transport device and lifebelt and has been tested and certified according to DIN EN 1497:2007 and DIN EN 1865-1:2015 clause 5.4.1.

RsqTec TURTLE has been developed for the rescue of injured persons from rooms with difficult access. The rescue system is used for the horizontal and vertical transport from exposed positions for rope and air rescue.
